Bassani / Est. 1969

BASSANI INFO TRADITION AND REPUTATION

The name Bassani has been recognized as a leader in specialized exhaust components for more than 30 years. Our performance history dates back to 1969, when we began designing exhaust systems for motorcycles. Although we still design and manufacture motorcycle exhaust systems, we have expanded our focus to include the automotive performance aftermarket. Car and truck enthusiasts today have a renewed interest in performance and Bassani precision-designed exhaust components are the easiest way to significantly improve power, performance, sound and fuel efficiency.

TECHNOLOGY AND CRAFTSMANSHIP

With over three decades of design experience focusing on maximum performance, Bassani has learned what works and what doesn't. We have the ability to develop products designed to optimize performance and the technical expertise to implement these designs. The emphasis at Bassani is excellence in design, quality of materials, precision fit and improved performance. Bassani is recognized for unsurpassed quality and fit; starting with superior materials for durability, precision mandrel bends for consistency and precise welding by expert craftsman. All stainless steel products are backed by a LIFETIME WARRANTY. Bx Performance products are covered by a limited warranty.

DEDICATION AND DEVELOPMENT

Our customer base is very loyal and is comprised of a growing number of enthusiasts who demand the very best. Our well-deserved reputation for cutting edge technology has provided Bassani with a very bright future as a leading exhaust system manufacturer. We are dedicated to providing our customers with the finest quality, performance and superior technology in every product we manufacture. Bassani is proud of the fact that all of our products are designed, tested and manufactured in the U.S.A.

PRIDE AND COMMITMENT

Because we have always been interested in racing, we also design and manufacture mufflers and exhaust components for competition use. Do they work? You bet they do! Our exhaust components have not only won races and set records, but have accompanied national champions to the victory circle.

STYLE AND SOUND

We have always been driven to design and manufacture products that offer superior performance, features and fit. No one builds in more bolt-on quality and performance than we do. Our systems fit ... they always have ... they always will! We use gasket-less ball and socket connections to simplify installation and our systems are shipped complete with premium highgrade mounting hardware. All Bassani Aft-Cat™ exhaust systems feature stainless steel tips polished to a "show quality" finish and a stainless steelband clamp for easier installation. Regardless of whether you're 18 or 80, Bassani delivers a distinct, deep exhaust note that's sure to impress.

RACE PROVEN PERFORMANCE

The true test of any exhaust system is in competition and that's why top racers choose Bassani. Since 1969, Bassani has been building exhaust pipes for race champions. The proof is in the history books. In 1978, Freddie Spencer, a world champion, raced Bassani pipes on his Superbike motorcycle. In the same year with Reg Pridmore, we won the AMA Superbike Championship. History is repeating itself today with Bassani and the world of racing. Our World Class competitors, Billy Glidden, Brian Meyer, Gene Hindman, Jay Meagher, John Urist, Cindy Blando, Andy Mays, Victor Downs, Bob Curran, and Justin Burcham, have helped Bassani become "The Exhaust" to run. Bassani is dedicated in supporting racers in NASCAR, NHRA, NMRA, PRO, PSCA, NOPI, NMCA and Fun Ford Organizations. Team Bassani is proud to provide promotional and contingency sponsorships, as well as product support. Our involvement in racing has led to the development of some absolutely spectacular performance equipment and it can be yours - because we race what we sell!

Bassani Xhaust / BX Performance

Our **Bassani Xhaust** brand is Top-of-the-Line in Aft-Cat exhaust systems and X & Y-Pipe Brand crossover pipes for Trucks (gas or diesel), Cars, and SUV's. Bassani Xhaust is recognized for unsurpassed quality and fit; starting with superior materials for durability, precision mandrel bends for consistency and precise welding by expert craftsman. All Bassani Xhaust stainless steel products are backed by a **LIFETIME WARRANTY**.

Features & Benefits

- Superior Quality Products
 - Gasketless Ball and Socket Connectors
 - Mandrel bent Stainless Steel Tubes welded into a unique proprietary "X" shaped chamber
 - Precision-engineered Stainless Steel product backed by a Lifetime Warranty
 - Applications available with or without catalytic converters
 - Premium Cats are used and all factory emission connections are retained on pipes
 - Superior Performance, and Unique Design
 - X & Y Pipes designed to scavenge exhaust gasses and increase performance
 - Significant gains in Power, Sound and Performance
 - High-Grade Premium, Stainless Steel Hardware
 - Complete with Superior Quality Mounting Hardware and Detailed Instructions
 - Mufflers are 100% stainless steel constructed for durability
- * Aft Cats legal in all 50 states, will not affect factory warranty or emissions standards. DB ratings do not apply.

BX PERFORMANCE is a line of "Composite" constructed Aft-Cat systems and X-Pipe Brand crossover pipes for Trucks (gas or diesel), Cars, and SUV's. Don't compromise... **BX PERFORMANCE** offers the same unique precision design, OE quality hardware, superior performance and Bassani sound at a more affordable price. These quality products are a fantastic value when compared to other ordinary aluminized systems. All **BX PERFORMANCE** parts feature aluminized steel pipes and precision-designed 16 gauge stainless steel mufflers. For built-in toughness and longer life, **BX PERFORMANCE** features stainless steel end caps and precision stainless steel welds. Unlike the competition, **BX** includes high-grade premium hardware, gasketless ball and socket connectors and polished stainless steel tips. You've seen the rest... now buy the best at an affordable price!

Features & Benefits

- More Affordable Price for a Quality Product
 - Gasketless Ball and Socket Connectors
 - Mandrel bent tubes welded into a unique proprietary
 - Precision-engineered aluminized steel product backed by a Limited Warranty
 - Applications available with or without catalytic converters
 - Premium Cats are used and all factory emission connections are retained on pipes
 - Same Superior Performance, and Unique Design as Bassani Xhaust
 - X & Y pipes designed to scavenge exhaust gasses and increase performance
 - Significant gains in Power, Sound and Performance
 - High-Grade Premium, Stainless Steel Hardware
 - Complete with Superior Quality Mounting Hardware and Detailed Instructions
 - Mufflers are 100% stainless steel constructed for durability
- * Aft Cats legal in all 50 states, will not affect factory warranty or emissions standards. DB ratings do not apply

Bassani High Performance Exhaust Systems

APPLICATION AUTOS

Bassani exhaust systems and components for street cars provide an immediate bolt-on performance increase. Whether it's a new set of our high quality tuned headers, power enhancing X and Y pipes, high-flow Universal Mufflers, or a complete Aft-cat system, Bassani has engineered power, sound and performance into every aspect. Our number one design criteria is performance: Bassani Xhaust is about increasing horsepower and torque, and we engineer, manufacture and test all components in-house to maximize performance results. Quality and fitment are never sacrificed - we design and install each automotive application in-house to make sure what we ship to you will fit right. From the header to the exhaust tip, we make sure we our parts fit your car. And don't forget: Bassani's expert staff can answer any questions you might have regarding your specific application. Inspired from our racing heritage, every Bassani component for street applications carries with it the highest levels of performance, quality, fitment and that pure Bassani sound that is sure to make the others envious.

* Not legal for sale or use on pollution controlled motor vehicles.
It is illegal to remove a properly functioning catalytic converter.

APPLICATION RACING

From the very start, Bassani has been involved in racing. Our roots started in motorcycle racing but it wasn't long before we developed headers and exhaust systems that found themselves in road racing, circle track, drag racing, and off road racing. The reason is simple - Bassani designs exhaust to maximize power! Our 35 years of experience has seen Bassani components on many of the fastest cars in the country, from local track stars to national champions. The secret to our racing success derives from superior engineering and design criteria combined with the first-hand experience that only comes from years of dedication to racing. The result is exhaust components and systems that get what racers want: More power to the rear wheels! Our dyno tests prove we make a difference in power. For the drivers running Bassani exhaust, they prove it in the Winner's Circle.

* Not legal for sale or use on pollution controlled motor vehicles.
It is illegal to remove a properly functioning catalytic converter.

SMC350 3-1/2" Round - Race Muffler

RM304512 3" Oval - Race Muffler

RM254512 2-1/2" Oval - Race Muffler

APPLICATION TRUCKS & SUVs

If you're driving a truck or SUV these days, you want two things: power and fuel efficiency. Bassani exhaust systems give you both, along with that pure Bassani sound that tells others you've got a ride that's tuned to perform. Bassani exhaust systems and components increase the flow rate providing more efficient evacuation of the exhaust. That provides increased power and torque curves for your vehicle - up to a 25 horsepower increase of bolt-on power! Your truck or SUV will carry bigger loads and tow with more power, while also increasing gas mileage - something every driver can appreciate! Bassani manufactures a wide variety of Cat-back systems that provide multiple exhaust solutions for your truck. Whether it's a dual exhaust, two-into-one, wheel forward exit or just a stock replacement, Bassani has the right system for your vehicle. Anyway you choose it, you'll get power, performance, style, and a pure, rich sound that will enhance every driving experience.

* Not legal for sale or use on pollution controlled motor vehicles.
It is illegal to remove a properly functioning catalytic converter.

APPLICATION DIESEL TRUCKS

Bassani Exhaust Systems exceed the expectations of even the most demanding diesel fanatics and enthusiasts. Whether you drive a Ford, Chevy, or Dodge, we have the specific components to dramatically enhance the performance and sound of your truck as well as the appearance of your chassis. Standard factory exhaust systems do not allow a diesel engine to achieve its maximum performance potential. Bassani's exhaust systems exceed your expectations by maximizing your truck's performance. We say this with confidence because of our superior engineering, and we use only premium quality materials when manufacturing our diesel systems. Additionally, our systems are built for greater durability to surpass the service life of stock systems, providing you with long-lasting, reliable high performance. Bassani offers two options to satisfy your diesel performance needs. Our Bassani Xhaust full stainless steel systems not only deliver the best quality, but also carry a lifetime warranty. Our BX Performance aluminized/stainless composite line offers great quality at a lower price, and is covered by the best warranty in the industry for systems that use aluminized components. At Bassani, we believe that our level of attention to detail exceeds other aftermarket exhaust companies, and this is what sets our diesel systems apart from the crowd. We are convinced that you will not find another product that offers you the same level of performance, quality, and durability. And like all Bassani systems, you get that great, pure Bassani sound. See for yourself by trying a Bassani diesel system today!

CHEVY CORVETTE C4

- The hugely successful C4 Corvettes were produced between 1984 and 1996.
- Engines used were the L98, LT1, and LT4
- Bassani offers "421" series headers (part no. 57421C4) for 86-91 L98 equipped cars. Unique design offers a broader torque curve than conventional 4-into-1 headers and provides for maximum ground clearance available with a long tube header. Headers feature 3/8" lasercut flanges, 16 gauge steel tubing and hi-temp ceramic coating standard. Compatible with stock emissions system.
- A "Y" pipe is available to attach the above headers to the primary center converter.
- Aft-Cats Systems are available for 84-90 (part no. 57905) Corvettes and also 92-95 Corvettes (part no. 57935)
- Bassani Xhaust Aft-Cat systems feature all stainless steel construction throughout including 3" polished tips. BX Performance Aft-Cat systems feature stainless steel mufflers with polished 3" stainless steel tips and 16 gauge aluminized steel tubing. Both systems deliver performance gains of 10-15 RWHP.

C5 / C5 Z06

- Bassani was the first company to introduce the stamp formed "X" crossover to C5 Corvette enthusiasts. Since our introduction of the "original" many competitors have attempted to copy this design because of it's superior performance and sound attenuating qualities.
- Part no. 5797X is for all (including Z06*) 97-04 Corvettes. Typical performance gains on stock vehicles is 4-5 Hp and 5-6 ft. lbs. torque. This product works great by reducing interior resonance and deceleration "pop" usually more noticeable after installing aftermarket exhaust systems. *Does not install with 2Z06SS.
- X-pipes for C5's are also available in our BX Performance line (16 gauges aluminized)
- Bassani offers two sizes of "421" series headers for C5's. part no. 574213C feature primaries and is recommended for stock to mildly modified vehicles. part no. 574217C features 1-7/8" primaries and is recommended for supercharged and/or large displacement custom built engines. These headers provide more torque across the entire RPM band than conventional long tubes, providing the most improvement in drivability.

CHEVY CORVETTE C6

- Part No. 604217C are headers specifically designed to satisfy the exhaust breathing requirements of the new LS2. The unique design or our "421" series headers produces the widest torque band of any available header and the 1-7/8" primaries have proven in testing to be the minimum needed diameter to maximize the potential of this incredible engine. Further engine modifications will increase the need for these headers to be used over competitors 1-3/4" primary sized headers. There is no decrease in ground clearance over stock.
- Part no. 60C65 is an Aft-Cat system designed to replace the dual muffler at the rear of the car with our revolutionary single center-mount muffler with incorporates the famed "X" into the muffler itself. The performance increases and weight savings of this system are superior to dual-muffler systems. Special polished dual merged tips finish off this system of extraordinary performance and quality. Power Gains of 12-14 HP - 7-9 ft lbs of torque.
- Part no. 60013 is a Bassani metal substrate performance convertor kit used in conjunction with our "421" series headers and Aft-Cats to provide you with the most efficient system possible

Bassani Aft-Cat Reference

Bassani CompCats

Modern metallic catalytic converter technology has come a long way from the original pellet and ceramic monolith designs of the early 1970's. Original converters were developed to convert exhaust gas emissions into harmless carbon dioxide and water vapor with no regard to the impact they would have on engine performance. Due to the performance limitations they caused, catalytic converters were promptly and illegally ditched from the exhaust systems of some vehicles in order to boost engine performance. At the time, you could see improvements of 20 HP or more from a V-8 equipped vehicle by simply removing the factory converters. However, the removal of the catalytic converter not only caused higher pollutant emissions, but it also produced more interior vehicle resonance.

Now with metallic substrate converters you can have it all—the larger cell structure of metallic converters (300 cells per inch for Bassani CompCats) produces higher flow numbers compared to ceramic cats, which equates to higher performance for your vehicle. The increased durability of a metallic core compared to a ceramic core also means you no longer have to fear damage caused by a minor impact to the converter (i.e. speed bumps).

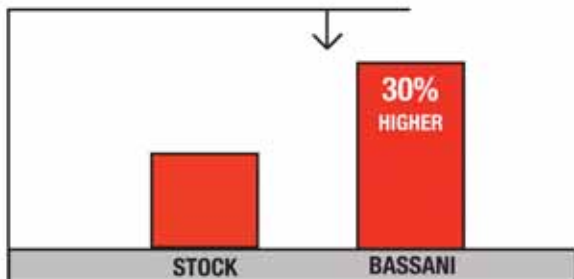

Independent comparison tests proved that Bassani CompCats caused very little drop in power compared to the off-road pipe. Bassani CompCats considerably reduced the interior resonance level of the test vehicle.

The design of the converter's housing enables it to produce more power—Bassani CompCats' extreme divergent inlet angle and gradual convergent outlet angle work together to create superior exhaust flow in the most compact size possible.

* Not legal for sale or use on pollution controlled motor vehicles. It is illegal to remove a properly functioning catalytic converter

UNIVERSAL CATALYTIC CONVERTERS			
PART#	APPLICATION	DIMENSIONS	NOTES
25MSC	Universal Comp Cat	2.5" x 13"	Metallic Substrate - 20-30% more airflow
30MSC	Universal Comp Cat	3" x 13"	Metallic Substrate - 20-30% more airflow
BX25OMC	Universal Comp Cat	4" x 13"	Metallic Substrate - 20-30% more airflow

FLOW RATE

Bassani Muffler Technology

THE HISTORY

Hot-rodders of the 60s desired the power levels of running un-muffled exhaust without the increased noise levels that came with it. As a compromise, they used either the original "turbo" style mufflers from a turbo-charged Corvair or "glass packs" in an effort to achieve more power through mufflers. Due to recent advancements in exhaust system technology, you no longer need to tolerate ear-splitting sound levels to achieve great performance.

A handful of exhaust pioneers began working independently to unlock the mysteries of the physics of exhaust gas dynamics and applied them to improved header, crossover and muffler designs. Darryl Bassani was one such pioneer—he used his research and knowledge to help National Champion motorcycle racers dominate tracks across the country in the late 60s and throughout the 70s. The experience gained through racing development allowed Bassani to produce motorcycle exhaust systems for street and off-road bikes that were second to none. In fact, we still produce motorcycle exhaust systems for Harley's that outperform our competition on the dyno and in real world street and track testing, riding and racing.

Darryl had always been a car junkie as well and desired to design and manufacture top-of-the line racing/street performance exhaust systems and components for cars too. From his late nights at the shop and long weekends at the track, Bassani's unique proprietary muffler design was born.

THE DIFFERENCE

Today there are two basic methods used for exhaust attenuation—absorption and reflection. Through testing and evaluation, we determined that absorption works best for producing maximum power AND lower levels of resonance. While other manufacturers also use absorption materials in their mufflers, their approach fails to capitalize on all the advancements made in exhaust gas dynamics through the last quarter century. These other manufacturers are merely producing a glorified glass pack by wrapping a slightly offset-bent, perforated tube in absorption material and welding it into a muffler-shaped can. In contrast, all Bassani mufflers utilize a specially engineered twin-core internal design for power, performance and great sound, along with stainless steel construction and a lifetime warranty. Bassani's finessed technology makes them the #1 choice of racers and street performers.

So when you buy your next muffler for street or race, remember it's what's inside that makes a performance difference—the Bassani Difference!

Bassani Universal & Race Mufflers

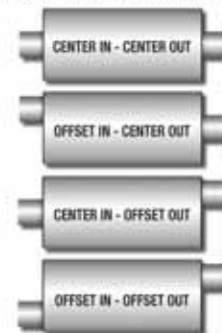

With the release of our dBX performance mufflers, you no longer have to choose between superior lifespan and appearance of stainless steel and the low cost of lesser quality materials. You can now obtain the benefits of a stainless steel muffler at a price that is only slightly higher than other manufacturers' aluminized mufflers: with Bassani's dBX Mufflers.

We have two different case sizes, four different inlet/outlet configurations and two different grades of stainless steel for you to choose from. These precision-engineered mufflers feature our proprietary 100% stainless steel twin-core internal structure, high temperature E-glass matting and either a T-304 (Bassani Xhaust brand) or a 409 stainless steel case (BX Performance brand). In addition, all end-caps and inlet/outlet tubes are also composed of stainless steel for ultimate durability.

Because we realized many people will be installing these mufflers on street rods and other high-dollar restoration projects, we elected to T.I.G. weld the seams to produce their unmatched finished appearance. All mufflers in this series are built with 2-1/2" I.D. inlets and 2-1/2" O.D. outlets for proper flow orientation. The 4 x 8 x 16 mufflers are sized for single/dual muffler systems in cars, while the larger volume of the 5 x 10 x 24 case works well to better attenuate unwanted interior resonance in vehicles with larger interior volumes such as trucks and SUVs.

Race Mufflers

Because race mufflers have different requirements than street performance mufflers, professional racers continuously use and test our race mufflers and provide us with the data and feedback that we use to perfect our designs. These racers include Billy Glidden, John "The Fireball" Unist, Brian Meyer, Andy Mayes, Bob Curran and numerous others.

The four different elliptical mufflers in our race series mufflers are all lightweight stainless steel (less than 4 lbs.) and feature an interior perforated core that is larger than the inlet and outlet tubes in order to capitalize on the advantages of exhaust gas expansion. Our round oval track/sprint car muffler features a perforated and lowered core to assist in meeting the strict noise regulations of this type of racing.

Bassani Custom Mufflers

In addition to offering our non-specific application dBX series mufflers, we continue to build custom fabricated mufflers for applications requiring special inlet/outlet configurations or internal attenuation components. You just tell us what you need and we'll craft the perfect mufflers for your project. Call the Bassani reseller of your choice or our tech department to get more specifics about this popular and exclusive service we provide.

Materials and Craftsmanship

Because mufflers are subjected to the extreme conditions of the environment and/or the caustic water vapor produced by catalytic converters, we build our mufflers from non-corrosive T-304 stainless steel, which ensures that your muffler will last for many years; we do not use galvanized, aluminized or painted mild steel to construct mufflers. You can choose to order your mufflers with slip-connector style inlets/outlets, with O.D. sized tubes for a smooth butt-welded installation or with ball and socket connections to allow for more system adjustment. Each muffler made through our custom build service is hand-made, 100% MIG welded and fully covered by our lifetime warranty.

Custom Mufflers... Built to Order.

To order Custom Mufflers, specify as shown in this part number chart...

Part Number... **5** Case Height 5" · **10** Case Width 10"
24 Case Length 24" · **#** Configuration (1-9)
51024#23 **2** Inlet(s) dia. 2 1/2" · **3** Outlet(s) dia. 3" · 3

EXHAUST SOUND - the smaller the Muffler HOUSING (Height & Width) the greater the exhaust sound. The Larger HOUSINGS emit quieter exhaust notes.

Accessories

Gasketless Ball & Socket Connector Kits

To simplify installation, we offer gasketless stainless ball and socket connector kits that don't leak like three bolt flanges, yet allow easy installation or removal of components. Our standard flanges for production cars and trucks feature a rugged 2-bolt design.

Billet Aluminum 4-Bolt Design

For the custom and street rod market, we offer optional ball and socket connector kits featuring our unique, two-piece four-bolt billet aluminum flanges. Again, there are no gaskets. No leaks. No hassle. And to compliment your undercarriage, flanges are available polished, or with blue, red or black anodizing.

Bronco Flange Rings for 302 or 351W	150501

Footnote: Flange rings required for use with stock exhaust manifolds or small collector style headers. Not needed if using Bassani equal length headers.

Tubing Adaptors & Slip Connectors

What do you do if you are fabricating a new exhaust system and your existing head pipes are smaller in diameter than the new exhaust tubing you are planning to use? To solve this common problem, we offer various stainless adaptors to easily transition 2", 2 1/4" or 2 1/2" tubing to 3" tubing, popular with builders interested in obtaining maximum performance from large displacement or modified engines. To further simplify custom exhaust fabrication we offer 16-gauge stainless slip connectors for 2", 2 1/4", 2 1/2" and 3" tubing.

X-Bone™ Urethane Exhaust Hangers & Billet Hanger Kits

Hangers and brackets are two of the most overlooked components in any exhaust system. Until now, custom builders have had to fabricate their own parts, or settle for inexpensive universal brackets that are crude and look out of place on street rods, muscle cars, sport trucks and the like.

No longer, Bassani X-Bone™ urethane hangers and aluminum brackets are compact and easy to install. Urethane X-Bones are available in blue, red, yellow and black, and come with either 1/2" or 3/8" mounting holes (std. Chevy and Ford). Brackets are offered in both 3" and 4 1/2" lengths. Finishes include red, blue or black anodized. Polished brackets are also available.

Bassani Exhaust Tips

Bassani Stainless Steel and Ceramic Coated exhaust tips come in a variety of styles and sizes. All stainless models are polished to a show quality finish and come complete with a stainless steel band clamp to simplify installation. Every Bassani AFT-CAT™ exhaust system features exclusively designed stainless steel tips that are sure to enhance the look and sound of your vehicle. Numerous applications feature baffled exhaust tips that will manage resonance and soothe the exhaust note inside your vehicle. Ask your dealer about our new Modular Anodized Aluminum Tips for your Corvette!

J Bends, U Bends & Exhaust Tubing

Although we make complete Bassani exhaust systems for a wide variety of performance cars, popular trucks and SUVs, what if you have a street rod, restored or modified muscle car or the like? You can fabricate your own exhaust system using our mild steel or stainless J Bends, U bends and straight exhaust tubing described in this section.

All Bassani J and U Bends are made on state of the art mandrel benders. The results are wrinkle free bends to suit the most discriminating builder. J and U Bends are available in a variety of tubing diameters and radiuses to suit virtually every need.

Bassani Automotive Warranty Information

THE EXHAUST SYSTEMS FEATURED ON THIS SITE ARE NOT INTENDED FOR USE ON POLLUTION OR NOISE CONTROLLED VEHICLES UNLESS USED IN ORGANIZED, SANCTIONED, OR COMPETITION EVENTS. CHECK LOCAL AND STATE LAWS FOR STREET USE.

BX PERFORMANCE

BASSANI'S BX PERFORMANCE LINE OF PRODUCTS ARE COVERED BY A LIMITED LIFETIME WARRANTY WITH ORIGINAL PROOF OF PURCHASE ONLY, TO COVER MANUFACTURING DEFECTS. ALL ALUMINIZED COMPONENTS ARE COVERED AGAINST DEFECTS IN MATERIALS AND WORKMANSHIP FOR 18 MONTHS FROM DATE OF PURCHASE. ALL STAINLESS COMPONENTS IN THE BX PERFORMANCE LINE ARE COVERED BY OUR LIFETIME WARRANTY.

BASSANI® XHAUST

BASSANI XHAUST WARRANTS ITS STAINLESS STEEL PRODUCTS TO BE FREE FROM DEFECTS IN MATERIALS AND WORKMANSHIP FOR AS LONG AS THE ORIGINAL PURCHASER SHALL OWN THE VEHICLE ON WHICH IT WAS ORIGINALLY INSTALLED. THIS WARRANTY APPLIES ONLY TO PRODUCTS ADVERTISED FOR INSTALLATION AND USE ON STREET VEHICLES, WHICH ARE TO BE OPERATED ON PUBLIC ROADS AND HIGHWAYS.

BASSANI XHAUST'S HIGH PERFORMANCE PRODUCTS INCORPORATING CATALYTIC CONVERTERS ARE NOT STREET LEGAL AND ARE NOT DESIGNED OR ADVERTISED FOR USE AS STOCK REPLACEMENT PARTS. ALL SUCH PARTS SHALL BE COVERED UNDER THE ABOVE WARRANTY WITH EXCEPTION OF CATALYTIC CONVERTERS THEMSELVES, WHICH CARRY A SPECIFIC 90-DAY WARRANTY. THIS WARRANTY COVERS DEFECTS IN MATERIALS AND WORKMANSHIP ONLY AND DOES NOT COVER CATASTROPHIC FAILURE, SUCH AS CATALYST OVERHEATING DUE TO STATE OF ENGINE TUNE OR PHYSICAL DAMAGE IMPOSED UPON THE CONVERTER HOUSING.

NICKEL (INDUSTRIAL CHROME) FINISH ON HEADERS IS WARRANTED UNTIL INSTALLATION AND USE OF PRODUCT AT WHICH TIME IT IS CONSIDERED TO HAVE A LIMITED RESISTANCE TO RUSTING, DISCOLORATION AND PEELING. HIGH TEMPERATURE CERAMIC HEADER COATING IS WARRANTED AGAINST DE-BONDING AND TUBE "RUST THROUGH" FOR AS LONG AS THE ORIGINAL PURCHASER SHALL OWN THE VEHICLE ON WHICH IT WAS ORIGINALLY INSTALLED. SUPERFICIAL SURFACE RUSTING OF HEADER COATING, ESPECIALLY BETWEEN TUBES, IS CONSIDERED NORMAL AND THEREFORE NOT WARRANTED AS A DEFECT IN MATERIALS AND WORKMANSHIP.

BASSANI XHAUST MUFFLERS ARE NOT WARRANTED TO PRODUCE OR CANCEL ANY PARTICULAR TONE, NOTE OR RESONANCE. AS SOUND PREFERENCE IS PURELY SUBJECTIVE, BASSANI XHAUST RECOMMENDS YOU CONDUCT THOROUGH RESEARCH PRIOR TO MAKING A PURCHASE.

ANY MODIFICATION TO AN ORIGINAL "AS SHIPPED" BASSANI PRODUCT SHALL VOID ITS WARRANTY. ANY DEVIATION FROM THE ORIGINAL INTENDED INSTALLATION OF A BASSANI PRODUCT SHALL ALSO RENDER THE WARRANTY VOID.

BASSANI PRODUCTS ARE COVERED UNDER NO OTHER WARRANTY, EXPRESSED OR IMPLIED AS TO MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OTHER THAN MENTIONED HEREIN.

TO BE CONSIDERED FOR WARRANTY REPLACEMENT OR REPAIR, AT THE DISCRETION OF BASSANI XHAUST, ALL PRODUCTS MUST BE RETURNED, WITH PROOF OF PURCHASE, TO BASSANI VIA PRE-PAID FREIGHT. ELIGIBILITY FOR WARRANTY CONSIDERATION SHALL BE VERIFIED WITH CORRECTIVE ACTION REQUIRED UPON VISUAL INSPECTION OF PRESUMED DEFECTIVE PRODUCT. BASSANI XHAUST SHALL NOT BE RESPONSIBLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO: INSTALLATION LABOR CHARGES, FREIGHT, OR LOSS OF USE OR DAMAGE TO VEHICLE.

IMPORTANT SUPPLEMENTAL WARRANTY INFORMATION

FEDERAL E.P.A AND INDIVIDUAL STATE LAWS MAKE IT ILLEGAL TO REMOVE PROPERLY FUNCTIONING OEM CATALYTIC CONVERTERS FROM VEHICLES, WHICH ARE OPERATED ON PUBLIC STREETS AND HIGHWAYS. AS SUCH, INSTALLATIONS OF BASSANI XHAUST'S CATALYST EQUIPPED PRODUCTS ARE NOT LEGAL FOR SALE OR INSTALLATION ON VEHICLES WHICH ARE OPERATED ON PUBLIC STREETS AND HIGHWAYS.

INSTALLATION OF THESE PRODUCTS AS INTENDED IN COMPETITION APPLICATIONS MAY REQUIRE USE OF MIL ELIMINATORS OR O2 SIMULATORS TO AVOID POSSIBLY SETTING A CATALYST DEFICIENCY CODE, WHICH WILL CAUSE ILLUMINATION OF YOUR VEHICLE'S "CHECK ENGINE" LIGHT. THIS IS DUE TO THE INABILITY OF CURRENTLY AVAILABLE AFTER-MARKET CONVERTERS TO EMULATE THE EXACT OPERATION OF FACTORY OEM CONVERTERS IN LATE MODEL YEAR OBDII EMISSION MONITORING / CONTROL SYSTEM APPLICATIONS.

BASSANI XHAUST RECOMMENDS AFTERMARKET CATALYST INSTALLATION TO BE FOLLOWED BY A SIX-MONTH ROAD TEST PERIOD TO DETERMINE THE NEED FOR SUCH A MODIFICATION.

SHOULD YOU REQUIRE WARRANTY ASSISTANCE, PLEASE CONTACT OUR OFFICES AT (866) 782-3283 TO OBTAIN A RETURNED GOODS AUTHORIZATION NUMBER.

Bassani Harley™ Warranty Information

BASSANI WARRANTS ITS MOTORCYCLE PRODUCTS TO BE FREE FROM MANUFACTURER DEFECTS FOR 1 YEAR FROM DATE OF PURCHASE ONLY. BASSANI MOTORCYCLE PRODUCTS ARE COVERED UNDER NO OTHER WARRANTY, EXPRESSED OR IMPLIED AS TO MERCHANTABILITY OR FITNESS FOR A PARTICULAR USE OTHER THAN MENTIONED HEREIN.

USE OF THE WORD HARLEY DAVIDSON®, VARIOUS MODEL NAMES, DESIGNATIONS, OEM PART NUMBERS ARE PROVIDED SOLELY FOR REFERENCE AND FITMENT INFORMATION. THERE IS NO AFFILIATION BETWEEN HARLEY-DAVIDSON®, INC. AND BASSANI MFG.

ANY MODIFICATION TO AN ORIGINAL "AS SHIPPED" BASSANI PRODUCT SHALL VOID ITS WARRANTY. ANY DEVIATION FROM THE ORIGINAL INTENDED INSTALLATION OF A BASSANI PRODUCT SHALL ALSO RENDER THE WARRANTY VOID.

TO BE CONSIDERED FOR WARRANTY REPLACEMENT OR REPAIR, AT THE DISCRETION OF BASSANI XHAUST, ALL PRODUCTS MUST BE RETURNED, WITH PROOF OF PURCHASE, TO BASSANI VIA PRE-PAID FREIGHT. ELIGIBILITY FOR WARRANTY CONSIDERATION SHALL BE VERIFIED WITH CORRECTIVE ACTION REQUIRED UPON VISUAL INSPECTION OF PRESUMED DEFECTIVE PRODUCT. BASSANI XHAUST SHALL NOT BE RESPONSIBLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES INCLUDING BUT NOT LIMITED TO: INSTALLATION LABOR CHARGES, FREIGHT, OR LOSS OF USE OR DAMAGE TO VEHICLE.

Power Curve True Dual

For Harley Baggers & Touring

POWER CURVE TRUE-DUAL CROSSOVER HEADER PIPES

- True Dual crossover header system perform as good as they look
- Direct bolt-on replacement for stock headpipes
- Feature proper port angle and patented matched-length rear headpipe design that produces even performance from each cylinder
- Offer improved low-end torque, appearance and an unmistakable exhaust tone
- Fabricated from 16-gauge steel, finished in show-quality chrome and supplied with three custom-fit heat shields (reuse two existing shields)
- Crossover systems accept Bassani 4" mufflers listed or any 95-07 OEM-style mufflers (sold separately)
- Bassani 4" slip-on mufflers feature 16-gauge steel construction, removable flow-through baffles and show-chrome finish.

Power Curve True Dual

For Harley Baggers & Touring

POWER CURVE TRUE-DUAL CROSSOVER HEADER PIPES

- True Dual crossover header system perform as good as they look
- Direct bolt-on replacement for stock headpipes
- Feature proper port angle and patented matched-length rear headpipe design that produces even performance from each cylinder
- Offer improved low-end torque, appearance and an unmistakable exhaust tone
- Fabricated from 16-gauge steel, finished in show-quality chrome and supplied with custom-fit heat shields.
- Crossover system will accept Bassani Softail slip-on mufflers (sold separately) and most aftermarket slip-on True Dual mufflers. Must use Bassani bracket# SFT-5339KT, Show chrome quality

NOTE: Header pipes and mufflers listed will not interchange with OEM components.
