should be applied
to all fastener
threads, pipe slip
joints and mating
surfaces of
ball /socket
connections.

<u>Parts List and Description</u>					<u>Hardware List</u>	
(A)	PN	7468302D	-driver side pipe	2	-3" clamps	
(B)	PN	7468302P	-passenger side pipe	1	-anti-seize tube	

Note: This mid-pipe kit was prototyped on a 1970 Chevelle equipped with a Hydramatic Turbo 400 automatic transmission. These pipes will also accommodate slight relocation of the transmission cross-member fore or aft from this position. However, no guarantee is given that they will fit any particular transmission cross-member location other than that for a Turbo 400. These parts can be modified, using tubing parts (straight or bends) available from Bassani if they will not fit your particular cross-member location. Please call our tech department to order such parts as needed (714) 630-1821.

Installation instructions:

- 1.) Raise and support vehicle.
- 2.) It is assumed that you have already installed Bassani 396-502 Big Block Chevy headers at this point. If you have not, please do so now before proceeding.
- 3.) These mid-pipes are to be installed with and at the same time as a Bassani 3" exhaust system for the same application; refer to the instructions included with the exhaust system to complete installation.
- 4.) If you are using these mid-pipes in conjunction with a custom or other aftermarket exhaust system, place the supplied clamps over expanded ends of pipes and install onto Bassani header collectors. Finish of the exhaust system as desired.
